Keith--

Yes, that would be fine. I can either look at it later on this afternoon or tomorrow.

Judy

Subject: PAH Report on Stormwater Pond Sediments

Judy,

Would you have a little time to look at the re-write of the first PAH report you reviewed for us. Bruce Wilson does not think it really makes a case for coal tar-based sealants as being the source of PAHs in stormwater sediments. Dale Thompson sent Frank an e-mail requesting some of your time and we have not heard back from him

Keith
