SEALCOATING

APPLICATION: Furnish and apply two (2) coats of concentrated rubberized coal tar emulsion protective pavement sealer meeting Federal Specification RP355e/ASTM D-3320 to bituminous concrete pavement as outlined below:

- Sweep and air clean area to be sealed.
- Pretreat oil spots with latex primer.
- Apply two (2) coats of **Tarconite and Paveshield** meeting Federal Specification RP355e/ASTM D-3320 with .02 gallon of **Armorflex** additive and 4-6 pounds of #60 silica sand blended with each gallon of emulsion.
Application rate: Entranceways - .45 gallon per square yard
All other areas - .32 gallon per square yard
- Clean up general work area.

2,555 Square Yards @ \$0.80/SY \$2,044.00

NOTES:

- Sealer may not bond properly to asphalt contaminated with oil.
- Owner is responsible for removal of winter sand.
- The Owner is responsible for removing vehicles and obstacles from the parking lot prior to the sealing and assumes any and all liability for the vehicles that are not moved. Additional mobilization charges will apply if we have to return to the job to finish once these obstacles are removed.
- Due to price increases on coal tar and fuel, this quote is good for only 30 days.

Breakdown

Lot 1: 13,000 SF Tarconite Lot 2: 10,000 SF Paveshield

Pm3

We propose to furnish material and labor — complete in accordance with above specifications, for the sum of : \$ 2,044.00
TERMS: 30% DEPOSIT REQUIRED, BALANCE DUE UPON COMPLETION.

Hi A - where are you getting the samples analyzed RLI or somewhere else? Also, if you are getting a contractor I need name to see if in system and we will need to do an agreement- same for the analyzes. Can you give me detail?

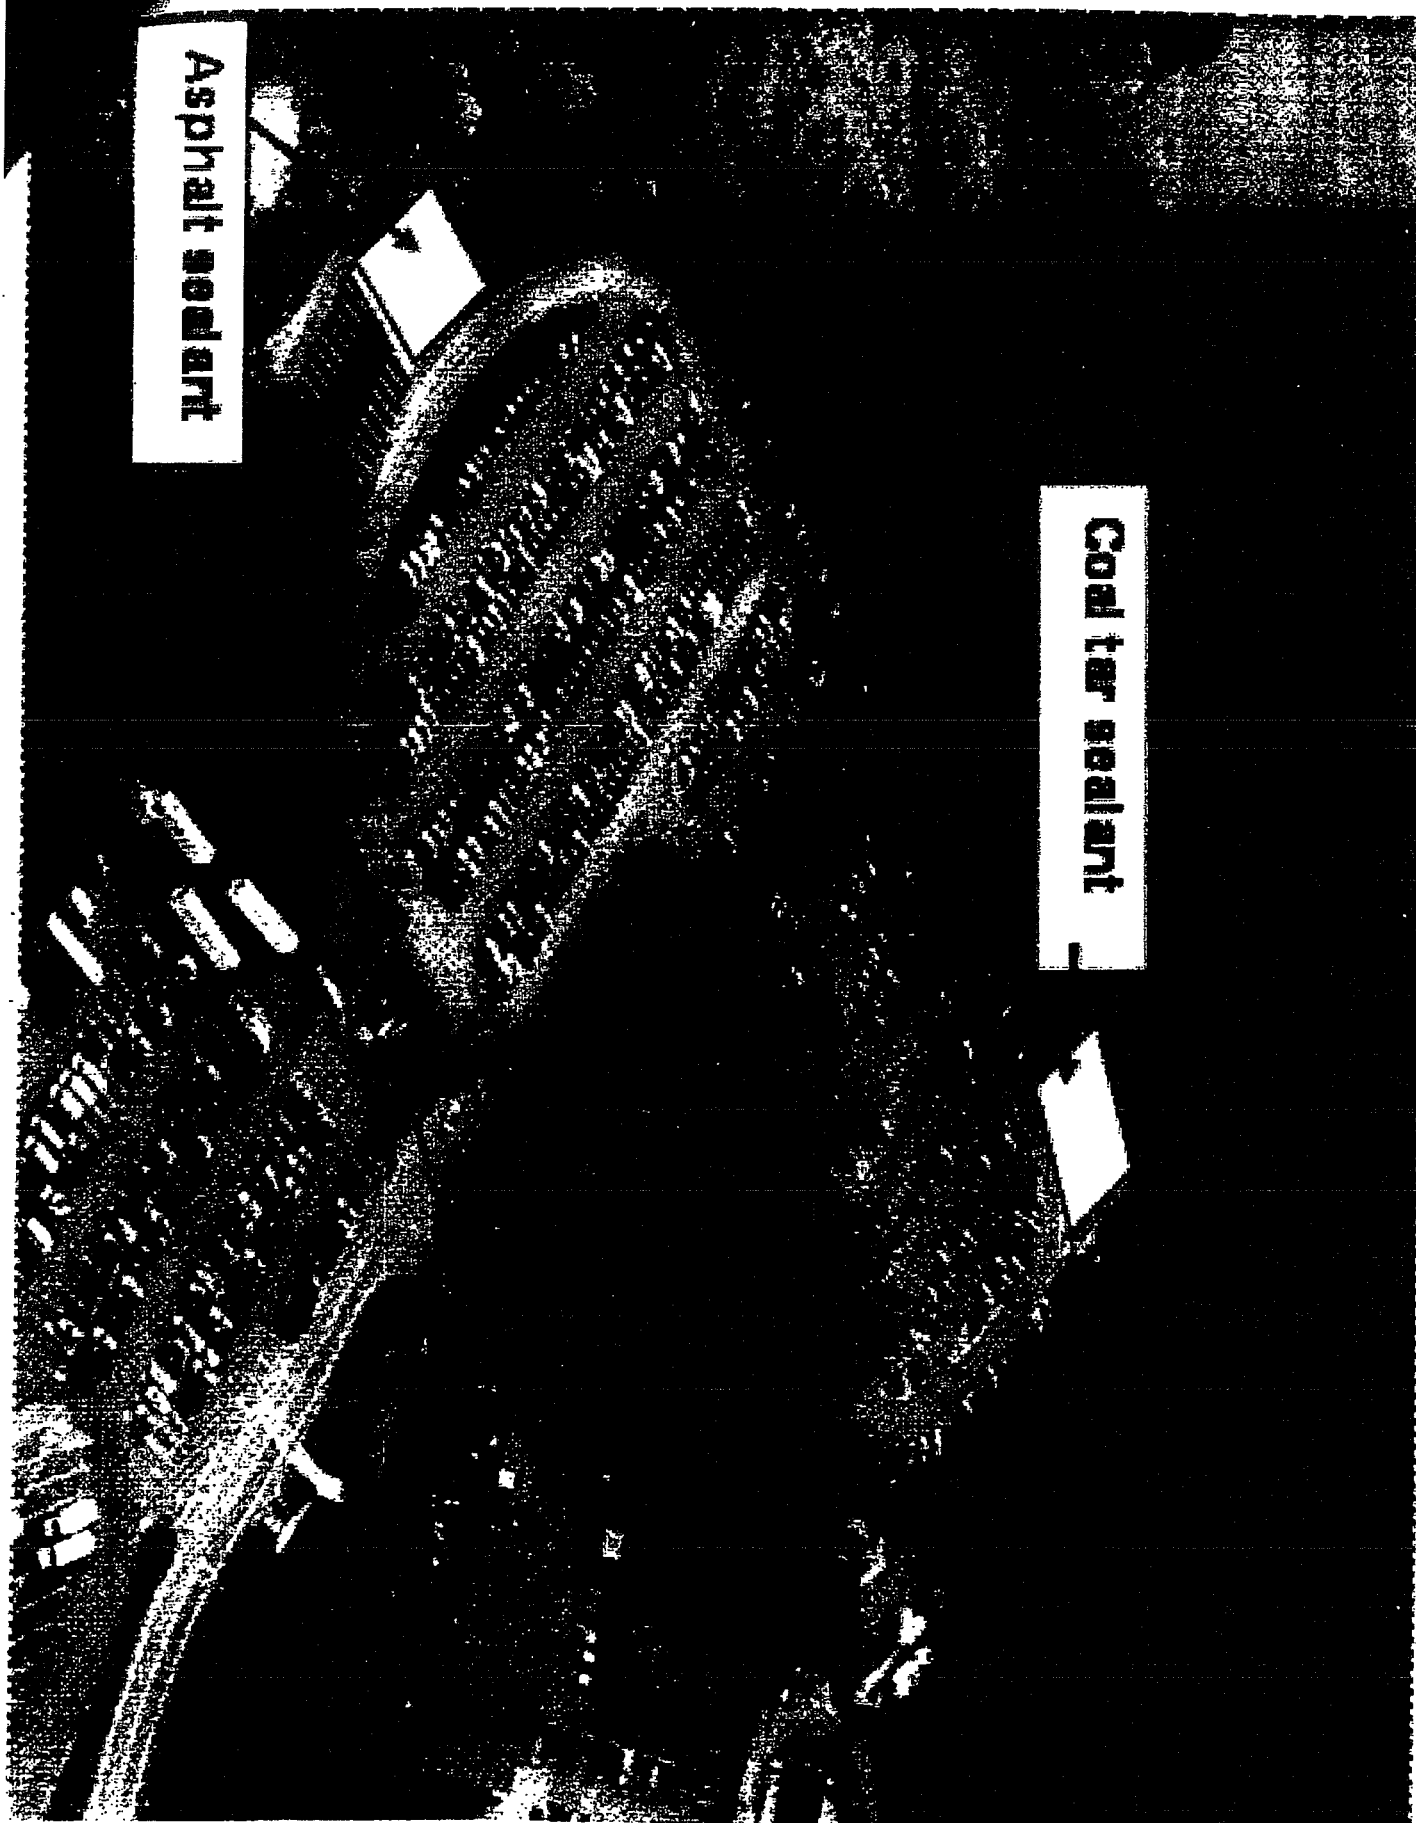

If you need stuff ordered I can place for you so \$ arent coming out of your pocket. Please advise. Thanks Kel
